PROCTOLUX® is a range of single use, fully disposable and self-illuminating proctoscopes for use in diagnosis and treatment of the anal cavity and rectum.
**PROCTOLUX®** is a range of single use, fully disposable and self-illuminating proctoscopes for use in diagnosis and treatment of the anal cavity and rectum.

**Infection Safety**

PROCTOLUX® reduces cross infection. PROCTOLUX® emerges from its packaging untouched from when it was produced. After use, the whole device including the attached battery and light is simply dropped into the clinical waste.

**Hygiene**

Some competitor products are supplied in boxes of 25 proctoscopes with a single re-usable pen light. The pen light must be cleaned between patients, but where are the safety guarantees? What is the cleaning procedure? Is a cleaning kit provided?

Other competitors use a power source and cable which is inserted into the instrument. Cleaning is a greater challenge with both the light and the cable needing attention.

**Patient Focus**

EVEXAR offers fully-disposable, pre-assembled self-illuminated proctoscopes. This saves time and unnecessary distractions to specialist clinicians who should be concentrating on the needs of their patients, not cleaning, assembling and disassembling instruments.

**Light**

Intense directed illumination source

Light delivered directly to diagnosis and treatment area

‘CLEAR VIEW System’ protects light guide

Ergonomic handle

Pull-tab to activate light

Fully disposable integral battery

Light delivered directly to diagnosis and treatment area

**Simplicity equals savings in time and money.**

No assembly, no disassembly. Finish use and drop device in the clinical waste bin.

**Fast, efficient, better**

There is no concern that the power source is missing or its light faulty.

**PROCTOLUX®** guarantees speed, simplicity and peace of mind.

**No concern over disposal.**

**PROCTOLUX®** is supplied in two sizes; 19mm and 25mm. The smaller diameter proctoscope is used mainly for examination purposes with the larger being used for treatments such as haemorrhoid ligation or injection.

The **PROCTOLUX®** has a revolutionary designed and patented ‘CLEAR VIEW System’ which protects the light guide to give a clear and unobstructed view of the examination area.

**Two sizes:** 19mm and 25mm
