Ergonomic handle guarantees precision during surgery.

Double-action jaws allow perfect dissection.

Curved and trapezoidal tip shape facilitates dissection.

Jaws rotate 360° and are adjusted using the ergonomic positioning wheel at the front of the handle.

The VECTEC dissector comes fitted with a standard monopolar connector.

Handle front piece and positioning wheel are coloured yellow to distinguish the VECTEC dissector from other VECTEC disposable laparoscopic instruments.

Electrical insulation is total right up to the active portion of the jaws.

The VECTEC dissector is packed in a sealed pouch and sterilized by ETO to EN 550 standards.

Packaging: box of 25 individually packaged units.
