The ergonomic body provides a comfortable hold and a clear feeling during the introduction.

The atraumatic blunt tip avoids the risk of perforation of intra and retroperitoneal organs.

The movement of a red-colored indicator inside the transparent body indicates the passing through of the various layers of the abdominal wall.

The specific sharpening of the needle guarantees a perfect perforation.

Single use permanently provides an optimal level of quality.

The needle is fitted with a stopcock and an integrated luer-lock connector.

The VECTEC pneumoperitoneal needle is packed in a double sealed pouch and sterilized by ETO to NF EN ISO 11135-1 standards.

Packaging: box of 25 individually packaged units.

**MD Class IIa**

**Made in France**
